About About

Lutheran Social Services About Counseling offers competent clinical counseling services in a confidential setting in communities across the state of North Dakota.

About Counseling specializes in providing services to adults, youth and adolescents with a continued commitment to the family's involvement in the therapeutic process. The network also includes therapists skilled in working with couples therapy and has several providers who are focused on serving the needs of veterans and military families

Our clinicians are credentialed mental health professionals and all meet state licensure requirements in their respective professions.

Cost of Care

LSSND strives to help families manage the cost of care by making all payment sources available. The cost of services can be paid by Medicare, insurance, medical assistance, or by the client.

We have developed an LSSND Abundant Care Fund for clients without the means to pay for therapy services.
